A-dec® IV Armboard

Extra support to help patients rest easy.

Comfort is everything during dental procedures—especially those requiring conscious sedation.

The A-dec IV Armboard is designed to streamline setup and comfortably support patients during IV sedation procedures, while allowing you to ideally position the arm to administer medications. With a universal base that seamlessly fits current A-dec dental chairs, it securely attaches to either side without bulky add-ons or modifications, and tucks away neatly into an operatory drawer when it's not in use.

Key Features:

- **Comfortable** – Padded support adds comfort during treatment.
- **Accessible** – Contoured shape positions arm for improved access.
- **Supportive** – Resistance-based tilt and 45-degree pivot supports the patient's arm during IV insertion.
- **Adaptable** – Securely attaches to either chair arm with 2" wide Velcro® straps.
- **Stable** – Durable powder-coated steel construction provides long-lasting reliability.
- **Easy to clean** – Upholstered pads wipe down easily using a recommended cleaner.
